VideoSpin is an application that helps you create movies from videos and pictures. The interface of the program is clean and attractive. You can import media by using the file browser or the "drag and drop" method. Simply move files to the timeline in order to create a clip. You can add 2D transitions, standard titles, pictures, sound effects (animals, background, crowd, squeaks, vehicles, and others), along with your own music to create a soundtrack. On the right side of the screen you can preview the clip or transition and you can also select the file type of the output (e.g. AVI, MOV, 3GP), preset (e.g. full screen, medium, small) and configure settings (e.g. compression, resolution, frame rate). Furthermore, you can use the "Undo" and "Redo" functions, configure project preferences (e.g. editing environment, format, default duration, folder for auxiliary files), audio and video preferences (e.g. enable full-resolution preview and background rendering, set a specific codec for background rendering), and more. The program uses a very high amount of system resources, contains a well-drawn help file and completes a task in a short amount of time, while keeping a very good image and sound quality. All in all, Pinnacle VideoSpin is a very good tool for developing movie clips from your personal files and we strongly recommend it to all users, whether they have previous experience in multimedia processing or not....

Also I had to wait more than 2 days to convert the first video and I'm not sure how the program works because it doesn't say how much downloading it does because of the 50 videos a day but it takes a lot of time in the download. All videos I downloaded are not good, bad, or re-encoded." - by: omvig Rating: 5/5 "Just what it says it is, it's the best one I have found and it even does all the other youtub videos that are listed on the site. You can edit the speed of the videos to fit your needs as well. So if you want an mp3 of a video just change the quality setting to medium and your done. It is the best!" - by: ajg Rating: 4/5 "It is the best to download youtube videos and convert them to mp3 because it can download up to 15 videos a day and it can also convert them. Unfortunately it took me a day to complete the registration process but once I did it I started downloading videos and converting them in less than a minute." - by: mikamalo Rating: 4.3/5 "Simple, well working software that is a great tool for those who have a different vision to always use on their iOS devices, especially those with Android OS. However, a warning: if you are downloading or converting too many videos, the connection may be slow. You
